

Touch ID Terms & Conditions

Touch ID allows you to use your fingerprint to login securely instead of entering your username and password. Your username and password will not be stored on this device. By enabling Touch ID, every person with an enrolled fingerprint on this device will have access to your WESTconsin account. We suggest reviewing the enrolled fingerprints to make sure that each person is authorized to access the personal and financial information available in this app. Fingerprints are only stored on your device and WESTconsin's app does not see or store your fingerprint information during the authentication process. You are responsible for safeguarding your mobile device. The use of Touch ID signifies you acknowledge these terms have been accepted by one or more of the persons who established the subject account with us. You are responsible for all transfers and/or transactions performed with Touch ID and agree not to hold WESTconsin liable for any errors. If you are not comfortable with these terms we suggest you not enable Touch ID and resort to using your username and password to gain access to your account thru this mobile device.
